

# DCB GROUP ENVIRONMENTAL POLICY

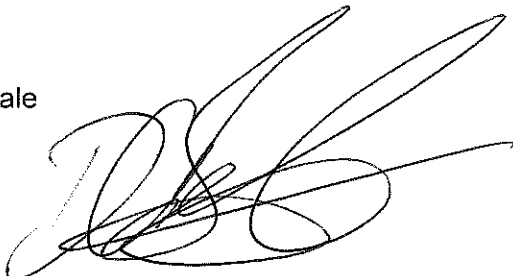

DCB Group encompasses Print Search Ltd., a print management company, Caspa Marketing, a creative/design company, DCB Digital, digital manufacturing and Aspen Corporate, litho manufacturing. All operate at Westinghouse Road, Trafford Park. DCB Group recognises that its business activities impact on the environment and strives to minimise this by continually improving its environmental performance and preventing pollution. Environmental achievements to date include reducing waste by encouraging our customers not to buy products in reserve, re-using packing materials/boxes and recycling paper, cardboard, phones, computer equipment and printer cartridges.

DCB Group is committed to:

- Developing and maintaining an environmental management system which conforms to ISO 14001
- Taking environmental issues into consideration when making core business decisions, including investment, innovation and operational or working practises
- Managing and monitoring its significant environmental aspects
- Compliance with all applicable environmental legislation and with other requirements to which the organisation subscribes which relate to its environmental aspects. This will be achieved by developing a register of legislation as part of our environmental management system as well as complete periodic compliance audits
- Purchasing where practicable, environmentally superior products and materials from suppliers who have demonstrated a commitment to good environmental practices, particularly from suppliers certified to ISO 14001 and/or FSC Certified
- Communicating this policy to all employees, clients, contractors and suppliers and raising environmental awareness with employees, through initial and ongoing training
- Demonstrating continual improvement in environmental performance and prevention of pollution by setting quantifiable objectives and targets. These targets are set at annual management review meetings and progress will be reported at environmental improvement meetings
- The following objectives and targets:
  - to minimise pollution arising from use of company vehicles and reduce unnecessary mileage
  - to prevent unnecessary wastage and reduce usage of electricity, gas, water and paper
  - to ensure the risk of fire is minimised thereby reducing the risk of air and water pollution arising from fire on site
  - to minimise usage of Print Chemicals which are harmful to the environment and ensure pollution risks from the disposal of hazardous Materials are minimised and reduce the amount of waste going to landfill
- Continual improvement and prevention of pollution at our site and from our activities by regularly checking our control procedures for waste disposal are being followed
- Making this policy available to the public via our website
